**11th International Geneva/Springfield Symposium
on Advances in Alzheimer Therapy
March 24-27, 2010**

11th International Geneva/Springfield Symposium on Advances in Alzheimer Therapy

As at the previous ten meetings, the 2010 Geneva meeting will continue to focus on the Pharmacological Therapy of Alzheimer Disease, giving particular emphasis to the discovery of new drugs.

At the same time, we will discuss the molecular and pharmacological basis of new clinical approaches. Early diagnosis and treatment is also a selective topic of the meeting, particularly the use of imaging techniques (MRI, PET and SPECT) in examining the clinical effect of drugs. The value of bio-markers and surrogate markers and the importance of risk factors on the therapy will also be evaluated. Drug development, design of clinical trials and pharmacoeconomics will be discussed.

The conference will be useful to specialists as well as non-specialists in order to understand the present pharmacological approach to the disease.

Sponsors are the Southern Illinois University School of Medicine, Springfield, Illinois, USA; University of Geneva Medical School, Geneva, Switzerland; and Geneva University Hospitals, the Department of Rehabilitation and Geriatrics, Geneva, Switzerland.

Organizers

Ezio Giacobini

Geneva, Switzerland

Jean-Pierre Michel

Geneva, Switzerland

Coordinators

Ann Hamilton (USA)

Christine Mesmer (Europe)

Meeting date

March 24-27, 2010

Location

CICG, International Conference Centre
Geneva, Switzerland
