

The Most Wonderful Time of the Year

Match Day is a little like opening presents on a holiday morning: the anticipation, the smiles and squeals of delight when you open the gift you've been wishing for all year. Medical students have worked hard for four years to achieve the thing they've been wishing for most — to become a physician. And on Match Day, they finally get to open the envelope that tells them where they will continue their training as residents. For them, the spring season of Match Day and graduation may be the most wonderful time of the year.
