Chief Medical Officer, SIU HealthCare

Approver:__________________________________________________________

Executive Director TeleHealth and Clinical Outreach,
SIU HealthCare

Document Owner:____________________________________________________

TeleHealth Clinical Coordinator, SIU Health Care

Authors: Nina Antoniotti, RN, MBA, PhD and Sarina Horn, RN
Created: June 1, 2015
Revised: May 3, 2017
TeleHealth Thinklabs Stethoscope

SCOPE

System Wide: This procedure applies to all regional telepresenters working with SIU HealthCare clinicians and SIU HealthCare’s partner TeleHealth organizations providing care via TeleHealth. This policy addresses clinical operations and patient care activities for both the Southern Illinois University School of Medicine and SIU Healthcare which will be collectively referred to as SIU.

PURPOSE

To outline the process for TeleHealth patient sites to prepare the environment for a TeleHealth visit.

PROCEDURE BODY

1. Turning the Stethoscope On and Off
   a. Hold any key until power turns on.
   b. Push and hold ♂ and ♀ simultaneously for two seconds, then release.
      *Stethoscope will automatically shut off after 2 minutes.

2. Using the Stethoscope
   a. Remove power cord from stethoscope.
   b. Insert black cord from the stethoscope hub into stethoscope.
c. Stethoscope hub needs red tabs to be positioned correctly to produce sound. The top tab should be pushed all the way to the right and the bottom tab all the way to the left.

d. Put headphones on to ensure heart and lung sounds can be heard.

e. Watch clinician for exam prompting.

f. Lightly place stethoscope on patient’s skin. Clothes will cause inadequate sound.

3. Exam Completion
   a. Make sure stethoscope is turned off.
   b. Unplug stethoscope from hub.
   d. Plug stethoscope in to power cord and place stethoscope in the case.
   e. Make sure cord is angled toward the bottom of the case.

f. Zip case and place in cart basket.
4. **Cleaning Stethoscope**
   a. Use alcohol or other cleaning agents, but do not allow liquids inside stethoscope.

5. **Tips and Considerations**
   a. If provider is having a hard time hearing, check volume and Hz setting.
   b. Do not set stethoscope volume louder than 8 or one click less than total volume.

Tips for Optimal Use

Instructions - There’s a lot more to learn - see http://thinklabsone.com/manual
Sound Levels - Do not set your stethoscope volume louder than necessary. Adjust volume so that heart and lung sounds are clear and comfortable to hear. Protect your hearing!
Diaphragm Pressure and Skin Contact - Making skin contact will provide you with the best sound quality. If you do listen through clothing, avoid listening through thick garments.
Headphone Fit - Make sure your headphones are as sealed as possible against outside noise to enhance your listening. Use Thinklabs headphones or other high quality headphones.
Cleaning - Use alcohol or other cleaning agents, but do not allow liquids inside One.

I. Charger Connection

![Charger Connection Diagram]

Charge only at ambient temperature 5-35C (41-95F)

Controls & Display

![Control & Display Diagram]
1. Power On / Off

**Power On** - Hold ANY Key until power turns on.

**Power Off** - Push & Hold (②) and (③) simultaneously for 2 seconds, then release.

**Auto Shutoff** - Your One will shut off automatically after preset auto shutoff time.

Battery Level flashes at Power Off

2. Volume Control & Display

Click (③) or (②) to adjust Volume Level. Hold keys to step quickly up or down.

⚠️ To reduce risk of tinnitus or hearing loss, listen at moderate volume levels.

3. Filter Selection & Display

- Filters selectively amplify low, medium or high-pitched sounds, to select for low-pitched heart sounds, mid-range murmurs or high-pitched lung sounds. One has multiple filters for greater control over sound than stethoscopes limited to the choice between Bell or Diaphragm.

- Pitch (i.e. frequency) is measured in Hertz (Hz) and displayed graphically on a low-to-high Hz Scale, which shows relative frequency range – filters that amplify low-pitched sounds show LEDs towards the left, filters for higher pitched sounds show LEDs towards the right.

- See http://thinklabsone.com/filters for further explanations and details.

**Select Filter** - a. Hold (⑦) Key for ∼2 seconds.

b. Release Key when LEDs change.

c. Repeat to cycle through filters.

**Set two “Favorite Filters”** - select 1st filter, select 2nd filter, then alternate easily between the two selections:

1. Select 1st Favorite - Steps a through c above.

2. Click (do not hold) (⑦) Key.

3. Select 2nd Favorite - Steps a through c again.

4. Click (do not hold) (⑦) Key to alternate between Favorites.

5. To use any other filter, simply do Steps a through c anytime and the Favorite you’re currently using will be changed.

4. Battery Level Check

To Check Battery Level:

1. Push any key to Power On.

2. Push & Hold (②) and (③) simultaneously for 2 seconds.

3. Battery Level flashes across 0-10 Scale when One powers off.

 رسميًا | باقيات | Tempo
---|---|---
Typical battery life in use ∼ 240 minutes active listening.

Standby/Power Off time > 4 weeks.

5. Setting Auto Shutoff Time

Start with One in the Power Off condition.

1. Turn Power On.

2. Click (②) Key once for each minute of the desired auto shutoff time.

   For example, click (②) Key 3 times for a 3 minute shutoff time.

3. Push and HOLD (③) Key until One shuts off (∼10 seconds).

- Factory Default = 2 minute auto shutoff time.

- Allowable range is one to ten minutes (1 - 10 clicks).

- To DISABLE Auto Shutoff (unit stays on), do 12 Clicks in step 2 above.
