RE: Alumni Report 2017

The Office of Alumni Affairs prepared the following 2017 Alumni Report that reflects selected characteristics of graduates of SIU School of Medicine. Throughout the years that this office has provided this report, the percentages have only slightly changed re: Current Specialty of Alumni in Practice. The data is current as of September 2017. Following are some highlights:

1. A total of 2,818 SOM students have graduated from the class of 1975 through the class of 2017.
2. Of those alumni in practice (2,176), the specialties that have attracted the greatest numbers are Family Medicine (475/22%), Internal Medicine (416/19%), and Surgery (289/13%). I have provided a breakdown with the subspecialties.
3. Thirty-eight percent of alumni in practice are in one of the primary care specialties of Family Medicine, General Internal Medicine, General Pediatrics or Medicine/Pediatrics. This remained the same percentage since 2015.
4. Alumni are currently practicing in most of the 50 states except Vermont. The largest number (910/42%) is practicing in 72 counties in Illinois. There were increases in Arizona, California, Colorado, Florida, Georgia, New York, North Carolina, Pennsylvania, Texas, and Washington. States which decreased are Indiana, Missouri, and Virginia.
5.
  - 29 alumni retired since November 2015
  - 12 alumni have died since November 2015
  - In reviewing the M/F ratios, female graduates increased from 7 to 23 in the class of '79 and then accounted for almost half of the class of '87 but dropped until the class of '94.
