

## Facilities *The medical school is located on two main campuses.*

**S**upporting SIU School of Medicine programs is a combination of University-owned and leased structures and affiliated community hospitals. Facilities for delivering the medical school curriculum are located on the Carbondale and Springfield campuses of SIU. Facilities in Carbondale support the first year of the program and those in Springfield support the remaining three years.

Three community hospitals in Springfield and Carbondale along with the VA Health Care System in Marion are the primary sites for clinical instruction. The School also leases additional space in Carbondale and Springfield for business and clinical offices and support services. The School's affiliated family medicine residency programs are supported with facilities in Carbondale, Decatur and Quincy.

Both campuses provide study carrels, audiovisual tutorial rooms and computer areas for individual study and seminar areas for group study. Auditoriums are available in both School and affiliated-hospital buildings. Laboratory experiences and research are carried out in well-equipped, multi-disciplinary learning and special project laboratories.

### **Carbondale Life Science III**

The Life Science III building on the Carbondale campus is located south of Life Science II along Lincoln Drive and provides state-of-the-art research facilities. Almost half the building is devoted to offices, labs and facilities to support the faculty in the School of Medicine. The building also houses plant biology, microbiology and zoology faculty from the University's College of Science.

### **Lindegren Hall**

Many School of Medicine activities in Carbondale take place in Lindegren Hall, located next door to the newly renovated University Morris Library. In addition to instructional areas, the building houses student affairs, medical education offices, the Medical Resource Center, faculty offices and the SIU Carbondale Physician Assistant program. Tutor rooms, Professional Development Laboratories and student study space are also available.

### **Wheeler Hall**

Built in 1904 as the original library for then Southern Illinois Normal University, Wheeler Hall now houses the School of Medicine's administrative office in Carbondale and the MEDPREP program. It also includes conference rooms, classrooms and study areas. Located on the edge of the "old campus" area, the building retains much of its original character even after major renovations completed in 1993.

## Springfield Medical Instructional Facility

The Medical Instructional Facility (MIF) in Springfield was built in two phases, completed in 1974 and 1977. It houses offices of the dean and other administrators, two lecture halls, tutor rooms, a teaching museum, the medical library and the Professional Development Laboratory, as well as some faculty and departmental offices. The research and research-support space includes nearly 30 research laboratories.

The Pearson Museum on the second floor of MIF is named for the late Emmet F. Pearson, M.D., a Springfield internist and medical history enthusiast. The museum's collection is strong in the areas of 19th-century domestic and patent medicines and therapeutic instruments, and 19th- and early 20th-century pharmacy and dental memorabilia.

## Springfield Combined Laboratory Facility

The Springfield Combined Laboratory Facility (SCLF) is connected on the north side of MIF and also houses laboratory and office space, including biosafety laboratories, for the Illinois Environmental Protection Agency and the Illinois Department of Public Health (IDPH). The structure provides controlled environment areas and immunology and virology laboratories. Research areas include molecular biology and the immunology of infectious agents.

The SCLF Addition houses additional research laboratories for the medical school including an electronmicroscopy suite as well as laboratories for IDPH and the forensic laboratory for the Illinois State Police.

## SIU Clinics

The SIU Clinics/Richard H. Moy M.D. building houses clinics for SIU HealthCare, the medical school's group practice. The facility contains exam and treatment rooms along with various offices and support services.

Additional clinic locations for the School are located in an adjacent medical office building, Baylis Medical Building.

The School's clinical faculty also see their patients in clinics in the Carol Jo Vecchie Women and Children's Center (WCC), The Pavilion, the Prairie Heart Institute and the SIU Surgical Clinic buildings, all connected to St. John's Hospital. A pediatrics clinic for Simmons Cancer Institute is in WCC.

The SIU Center for Family Medicine, with 30 exam rooms, is located at 520 N. 4th St., between the two hospitals. The Psychiatry department adult patient services are located at 901 W. Jefferson St. The child psychiatry clinics and academic offices are located in the Noll Medical Pavilion at 5220 S. 6<sup>th</sup> St. Road.

Simmons Cancer Institute at SIU in Springfield opened for patient care in 2010. The Institute offers state-of-the-art facilities for cancer research and physician and public education as well as treatment for patients in central and southern Illinois. Its goal is to develop partnerships with Illinois hospitals and other providers as well as research and clinical treatments currently unavailable downstate.

### Affiliated Hospitals

#### Memorial Hospital of Carbondale

Memorial Hospital of Carbondale is a regional medical center for southern Illinois. The 142-bed facility is served by a comprehensive medical staff and is the southern Illinois leader for cardiac services, obstetrics, pediatrics and more. Memorial has introduced advanced diagnostic, surgical and medical technology to the area. Memorial Hospital is also a teaching facility, home to SIU Family Medicine Residency Program and an affiliate of Simmons Cancer Institute.

a ten-bed patient unit serving all of downstate Illinois with acute burn care and rehabilitation facilities.

Serving a broad region in downstate Illinois, Memorial's Heart and Vascular Services provides diagnostic cardiology, vascular laboratory, diagnostic and interventional catheterization services, cardiac surgery and cardiac rehabilitation.

Memorial's Wound Healing Center provides comprehensive outpatient treatment for chronic, non-healing wounds. Other new outpatient services include Memorial ExpressCare sites for non-emergency medical care.

#### VA Health Care System

Marion VA Health Care System encompasses three states with the primary medical center and nursing home care unit located in Marion, Illinois. Community-based outpatient clinics are located in Mt. Vernon and Effingham, Ill., and Paducah, Ky., as well as an outpatient clinic in Evansville, Ind. The VA is a teaching hospital with emphasis on primary care, general surgery, urology, psychiatry and other patient services. Both medical students and residents from SIU School of Medicine gain diverse, well supervised experience from various rotations available there.

#### Memorial Medical Center

The flagship of the Memorial Health System, Memorial Medical Center in Springfield has 507 licensed beds with more than 3,000 employees and offers comprehensive inpatient and outpatient services.

Memorial's Centers of Excellence include Regional Burn Center, Regional Cancer Center, Heart and Vascular Services, Orthopaedic Services and Neurosciences and Regional Kidney Center.

Memorial's Emergency Services Department shares the Southern Illinois Trauma Center, a Level I trauma center, with St. John's Hospital and SIU. Memorial's Regional Cancer Center offers comprehensive care ranging from prevention and early detection to diagnosis, treatment and aftercare. The Regional Burn Center at Memorial is

#### St. John's Hospital

Founded in 1875 by the Hospital Sisters of St. Francis, St. John's Hospital in Springfield is a regional health care referral center with more than 400 beds that provides tertiary care for central and southern Illinois.

The Carol Jo Vecchie Women and Children's Center is home to St. John's Children's Hospital, a joint venture with SIU School of Medicine, that serves pediatric patients from throughout central and southern Illinois. The Children's Hospital includes a 40-bed level III neonatal intensive care unit, pediatric intensive care unit, intermediate and acute care facilities and pediatric rehabilitation. Carol Jo Vecchie women's services include a birth center and breast care services.

Physicians at Prairie Heart Institute perform cardiac catheterization and electrophysiology procedures and cardiovascular surgeries. In the Pavilion, St. John's offers day surgery, medical and radiation oncology, gastrointestinal care and the SIU Voice Center. St. John's Rehab South offers outpatient rehabilitation services and is home to AthletiCare, St. John's sports medicine program.

The hospital is an emergency medical services training center and, with Memorial Medical Center and SIU, shares the designation of Southern Illinois Trauma Center, a Level I trauma center.
