## VMWare Horizon

### Use VMWare Horizon for Remote Access

1. Continue to use the <http://support.hshs.org> page for the installation of remote access software **on your personal device only** (i.e. this does not apply to HSHS owned/provided devices).
2. Access <https://home.hshs.org> to log in to **HSHS Home**.
3. When prompted to log in, be sure to verify/select the correct domain.
4. Upon successful log in, select the desired applications/icons from the displayed **HSHS Home** window.

The screen displayed below is a sample to illustrate how the window appears.

Your available applications/icons may be different than shown below.
