### Year 1 (2020-2021)

#### Learning Activities include:
- Clinical skills, direct patient contacts, paper cases, standardized patients, small group case-based problems, and resource sessions (both small and large group).

#### A series of integrated clinical/basic science units with more complex clinical problems, advanced clinical skills and emphasis on pathophysiology, microbiology and pharmacology.

#### Year 2 (2021-2022)

#### Learning Activities include:
- Clinical skills, direct patient contacts, paper cases, standardized patients, small group case-based problems, and resource sessions (both small and large group).

#### A series of rotations through major clinical areas for a breadth of specialty and primary care-oriented clinical experiences, as well as a two week Doctoring experience focusing on the physician-patient relationship. Faculty will organize discipline areas and will include basic sciences.

#### Year 3 (2022-2023)

#### Learning Activities include:
- Increased clinical experience in association with advanced students and residents, more complex simulated or real patient problems in small groups, resource encounters and experiences in alternative health care systems.
Individually-oriented Pathways that provide opportunities for specialty-directed prerequisite skill acquisition, supplemental clinical experience, research, a 4-week Neurology Clerkship rotation, plus a 2-week Doctoring experience, geriatrics, and Y2 mentoring program.

Learning Activities include: direct patient contact in patient care teams, with continued emphasis on basic science concepts and skills for lifelong learning, as well as emphasis on career pathways. At the conclusion of this year, students should be ready to begin residency training.

Clinical Selectives and Electives

Clinical Selectives and Electives include: 1, 2, and 4-week electives, as well as residency planning activities.
