

Hello and Welcome,

I am honored that you have entrusted me with the care of your child. I will strive to provide the best possible care for your child and ensure that all of your questions are answered. Please feel free to ask any question you may have regarding the care and management of your child's diagnoses.

Enclosed you will find two questionnaires that I would like you to complete with your child prior to the appointment. I ask that you bring the completed forms with you to the appointment. However, if you do not have the forms completed or forget them at home, my nurse will provide you with a set of the forms at your scheduled appointment so you can complete them in the office.

There is a high likelihood that your child will require a urine test at this appointment. For that reason, I ask that your child come with a full bladder. While you are waiting if your child is in extreme need to use the restroom, please notify the reception staff. They will relay this information to my nurse and we will promptly bring your child back to the restroom.

I look forward to meeting you and your child at your scheduled appointment.

Sincerely,

Anne Foster, MSN, APRN, FNP-C
