

SMITH ALZHEIMER'S CENTER 2023 IMPACT SNAPSHOT

18

Studies, including investigator-initiated and sponsored clinical trials, to help find better treatments for dementia.

Welcomed Aida Adlimoghaddam, PhD, who joined the research team as assistant professor and established her lab.

2,105

Individuals served at our no-cost community outreach programs, including our seven Beyond the Medical Center programs.

More than 2,600 patient visits, both in Springfield and in Memory and Aging Network sites around the state.

From exploring biomarkers, effects of temperature, differences between males and females, the lab produced 12 publications on a variety of topics.

Educated more than 200 caregivers and health care professionals who attended the two-day Brain Aging Conference.

Served a 93-county area, with more than 200,000 people living with or caring for someone with dementia.

Offered cooking classes on healthy meal options for caregivers and patients in collaboration with SIU Culinary Medicine.
