256

Total attendance for our caregiving class, Dementia Caregiving 101

The mission at SIU Medicine's Smith's Center for Alzheimer's Research and Treatment is to connect patient care, education, and research to better understand aging, memory, and neurodegenerative disorders. By developing innovative, personalized care, we aim to improve life for patients, families, and communities. Through a blend of clinical care, neuroscience, and community partnerships, we're making important strides in dementia care and understanding.
