

# Advance your health care career Earn a biomedical science master's degree

**R1** TOP-TIER  
RESEARCH  
UNIVERSITY

## Southern Illinois University School of Medicine

The Biomedical Science (BMS) master's program helps students strengthen their applications for medical, dental, physician assistant and other health professions programs. This in-person, non-thesis program offers a focused, flexible path for students who want to build knowledge, gain experience and prepare for what's next.

### Why choose the BMS program?

- Take rigorous courses in anatomy, physiology, biochemistry, microbiology and immunology
- Get structured support for MCAT, DAT and GRE preparation
- Receive individualized advising and personal support every semester
- Learn how to write strong applications and sharpen your interview skills
- Earn your degree in two, three or four semesters
- Enter in the fall, spring or summer semester
- Add value to your resume with an optional anatomy teaching certificate (requires four semesters)
- Based in Lindegren Hall, home of SIU School of Medicine on the Carbondale, IL campus, features a dedicated BMS lounge, individual lockers and access to the Medical Resource Center.

### Location

Carbondale, Illinois – on campus at Southern Illinois University

### Additional pathway: MEDPREP

Students may also pursue the BMS master's degree through the Medical/Dental Education Preparatory Program (MEDPREP), a nationally recognized post-baccalaureate program for students from educationally and economically disadvantaged backgrounds. MEDPREP offers five semesters of academic preparation beginning each June.
