### Year 1

**Learning Activities Include:** clinical skills, direct patient contact, paper cases, standardized patients, small group case-based problems, and resource sessions (both small and large group).

Students move through the segments in small groups.

**Doctoring Streamer continues throughout the year (PAC, Continuity Clinic, Peer and Self Assessment)**

### Year 2

A series of integrated clinical/basic science units with more complex clinical problems, advanced clinical skills and emphasis on empathy, micro-biology, and pharmacology.

Learning Activities include: increased clinical experience in association with advanced students and residents, more complex simulated or real patient problems in small groups, resource encounters and experiences in alternative health care systems.

**Doctoring Streamer continues throughout the year (PAC, Continuity Clinic, Peer and Self Assessment)**

### Year 3

A series of rotations through major clerkship areas for a breadth of specialty and primary care-oriented clinical experiences, as well as an 18-week Doctoring experience focusing on the physician-patient relationship faculty across clinical discipline areas and will include basic sciences.

Learning Activities include: direct patient contact in patient care teams, with continued emphasis on basic science concepts and skills for lifelong learning. At the conclusion of this year students should have broad exposure to be able to develop career choices.

**Doctoring Streamer continues throughout the year (PAC, Continuity Clinic, Peer and Self Assessment)**

### Year 4

Individually-oriented Pathways that provide opportunities for specialty-directed prerequisite skill acquisition: supplemental clinical experience, research, a 4-week Neurology/Neurosurgery rotation, plus a 2-week Doctoring experience, genetics, and 12-mentoring program.

Learning Activities include: direct patient contact in patient care teams, with continued emphasis on basic science concepts and skills for lifelong learning, as well as emphasis on career pathways. At the conclusion of this year, students should be ready to begin residency training.

**Doctoring Streamer continues throughout the year (PAC, Continuity Clinic, Peer and Self Assessment)**

### Year 5

**Doctoring Streamer continues through the year (PAC, Continuity Clinic, Peer and Self Assessment)**

### Year 6

**Doctoring Streamer continues through the year (PAC, Continuity Clinic, Peer and Self Assessment)**

### Year 7

**Doctoring Streamer continues through the year (PAC, Continuity Clinic, Peer and Self Assessment)**

### Personalized Education Plan (PEP)

Students will continue to participate in small group, case-based discussions that promote basic science learning issues.
