Explanation of Potential Conflict:								
Review of Material Being Presented (slides or journal article)						Yes	No	
The content of this presentation does not promote or unfavorably present the product or service								
of a pharmaceutical or medical device company.								
This presentation provides a balanced view of therapeutic options that includes pharmacological, invasive, surgical or non-pharmacological approaches.								
Generic names for pharmaceutical/medical device products or services are used.								
All the recommendations involving clinical medicine in this CME activity are based on evidence that								
is accepted within the profession of medicine as adequate justification for their indications and								
contraindications in the care of patients.  All scientific research referred to, reported or used in this CME activity in support or justification of								
a patient care recommendation conforms to the generally accepted standards of experimental								
design, data collection and analysis.								
If an off-label or non-approved use of a drug or medical device is mentioned, the slide on which it								
appears indicates that it is off-label or non-approved use.  Recommendations								
	No conflict of interest exists							
	Conflict of interest exists and has been resolved by (select at least one):  □ Content changed □ Omitting recommendations for specific products							
		Content chang			-			
	<ul> <li>□ Selecting an alternate speaker</li> <li>□ Relationship / interest terminated</li> <li>□ Making recommendations that are based on structured review for best available evaluations</li> </ul>							
	Changing the focus of the presentation so that the content is not about products or services related to the							
	commercial entity							
	Peer review and revision of the content of the presentation, content validation
